Dr. Ankita Porwal

Technical Committee

Mr. Rajesh Kumar Dixit
Mr. Jaishankar Soni
Mr. Pankaj Rawat
Mrs. Elza Joseph
Mr. Nadeem Sheikh
Mr. Shiv Kumar Mishra

About CME

The Programmatic management of drug resistant tuberculosis (PMDT), formerly called as DOTS- PLUS, refers to programme based MDR-TB diagnosis, management and treatment. These are guidelines included under RNTCP which promote full integration of regular TB control activities and PMDT, in order to facilitate the earliest possible evaluation of TB patients under treatment for drug resistance and place them on appropriate drug regimens.

The drug resistant TB has become a major roadblock for TB control in India. It has multifactorial determinants like microbial, clinical, and programmatic factors. The health care providers and the community needs to made aware that the MDR-TB is a man-made phenomenon due to poor treatment, poor drugs and poor adherence to treatment.

Objectives of CME

- To obtain an overview of latest development in RNTCP.
- To sensitize the participants on MDR-TB burden, its causes, diagnosis and management.
- To discuss the issues/ experiences related to prevention, diagnosis and management of MDR-TB locally.

No. of participants – 60
(Faculty, Residents & Practitioners)

Registration fees—Nil
(First come first basis)

Speakers

Dr. Anand Das
Dr. Vijaya Lakshmi Nag
Dr. Ashwani Khanna
Dr. Kuldeep Singh
