Subject: Renewal Multiyear Proposal Elsevier SCOPUS

Respected Sir,

We thank you for continuing to be patrons to our product **Elsevier SCOPUS database** and I am happy to share the usage is continuously increasing with these products now widely accepted across your esteemed institution. With the advent of the pandemic this year, online clinical and education solutions available remotely to researchers, students and faculty have proven that treatment continues, research continues, education continues. Elsevier is proud to play a key role in enabling this for your esteemed institution. We request your consideration towards renewal of the current subscriptions empowering ng your students, faculty, and research teams.

About Scopus

Scopus is the largest abstract and citation database of peer-reviewed literature: scientific journals, books and conference proceedings. Delivering a comprehensive overview of the world's research output in the fields of science, technology, medicine, social sciences, and arts and humanities, Scopus features smart tools to track, analyse and visualise research.

Scopus is a source-neutral abstract and citation database, curated by independent subject matter experts. It places powerful discovery and analytics tools in the hands of researchers, librarians, institutional research managers, and funders. Scopus generates precise citation search results and automatically updated researcher profiles, creating richer connections between people, published ideas, and institutions. In addition to protecting the integrity of the scholarly record, Scopus helps bolster institutional research performance, rank, and reputation.

Go beyond search

Research is a complex pursuit. More than ever, finding the right result is as important as uncovering trends, discovering sources and collaborators, and analyzing the results for further insights. In addition to the search tools designed to help navigate across the over 75 million items indexed, Scopus also provides features to help researchers go beyond search, into discovery and analysis.

Search:

- Search by document, author or affiliation, or use Advanced Search
- Refine results by access type, source type, year, language, author, affiliation, funding sponsor and more
- Link to full-text articles your institution already subscribes to, along with other library resources
- Use the Document Download Manager to bulk retrieve results in .pdf format
- Export data to reference managers such as Mendeley, RefWorks and EndNote
- Stay up-to-date with Email Alerts, RSS and HTML feeds

- Find related documents by shared references, authors and/or keywords
- Identify collaborators or subject experts with Author Identifier
- Clarify your identity through integration with ORCID
- Identify and match an organization with its research output using Affiliation Identifier
- Benefit from indexing with Universal Discovery Services: EBSCOHost, Primo and Summon
- Take advantage of interoperability with other Elsevier solutions including ScienceDirect, Reaxys, Engineering Village and SciVal

Analyze:

- Track citations over time for a set of authors or documents using Citation Overview
- Assess trends in search results with Analyze Results
- View h-index for specific authors
- Analyze an author’s publishing output and research impact with Author Evaluator
- Gain insight into journal performance with Compare Journals, a tool allowing you to analyze journals across multiple metrics, including CiteScore, SNIP and SJR

Multiyear Renewal Quote

Multi Year Subscription		
Particulars	Subscription Period	
Elsevier-Scopus	30/09/2024 - 1/10/2025	
	30/09/2025 - 1/10/2026	
	30/09/2026 - 1/10/2027	
	30/09/2027- 1/10/2028
